About Me

- I am a student majoring in Information Systems, Networks, and Applications (SIJA) at SMK Negeri 2 Yogyakarta with interests in Software Engineering, Web Development, Mobile Development, and Internet of Things (IoT). I have experience building web applications using HTML, CSS, JavaScript, PHP, and MySQL, as well as Android applications using Flutter and SQLite. I enjoy learning new technologies, building real projects, and continuously developing my skills in creating useful software solutions. Currently, I am open to internship opportunities, project collaborations, and career development in the technology field.

Experience

● **(2026-2026)**

SOFTWARE ENGINER life media

- Developed an AI & IoT-based attendance system using facial recognition on NVIDIA Jetson Nano.
- Participated in network installation, device configuration, and infrastructure maintenance.
- Configured and operated real-time server monitoring to minimize downtime.
- Troubleshoot network issues and optimized IT infrastructure.

● **(2025-Present)**

BOOTCAMP + LES

Coding Studio

- Completed Cyber Security Bootcamp covering penetration testing, network fundamentals, and Linux commands.
- Learned fundamental algorithms and cyber security concepts through private lessons.
- Practiced network configuration, troubleshooting, and basic ethical hacking techniques.
